All documents of the application must be submitted in English.

Please visit our homepage for the SPRING application form and latest information about the SPRING Programme: www.spring-master.net

The city of Dortmund

A perfect setting for multicultural experience

Dortmund is located in the so-called Ruhr Area, which is the largest urban agglomeration in Germany with a total population of five million inhabitants. The Ruhr Area was once famous for its coal and steel industries and is now a centre of high-end manufacturing, finance, higher education and culture. Given its cosmopolitan population and the blend of old and new, Dortmund is a perfect example of 21st century Germany. Using the highly efficient public transport system, you can easily explore the entire Ruhr Area agglomeration. Thus SPRING is more than just learning at the university.

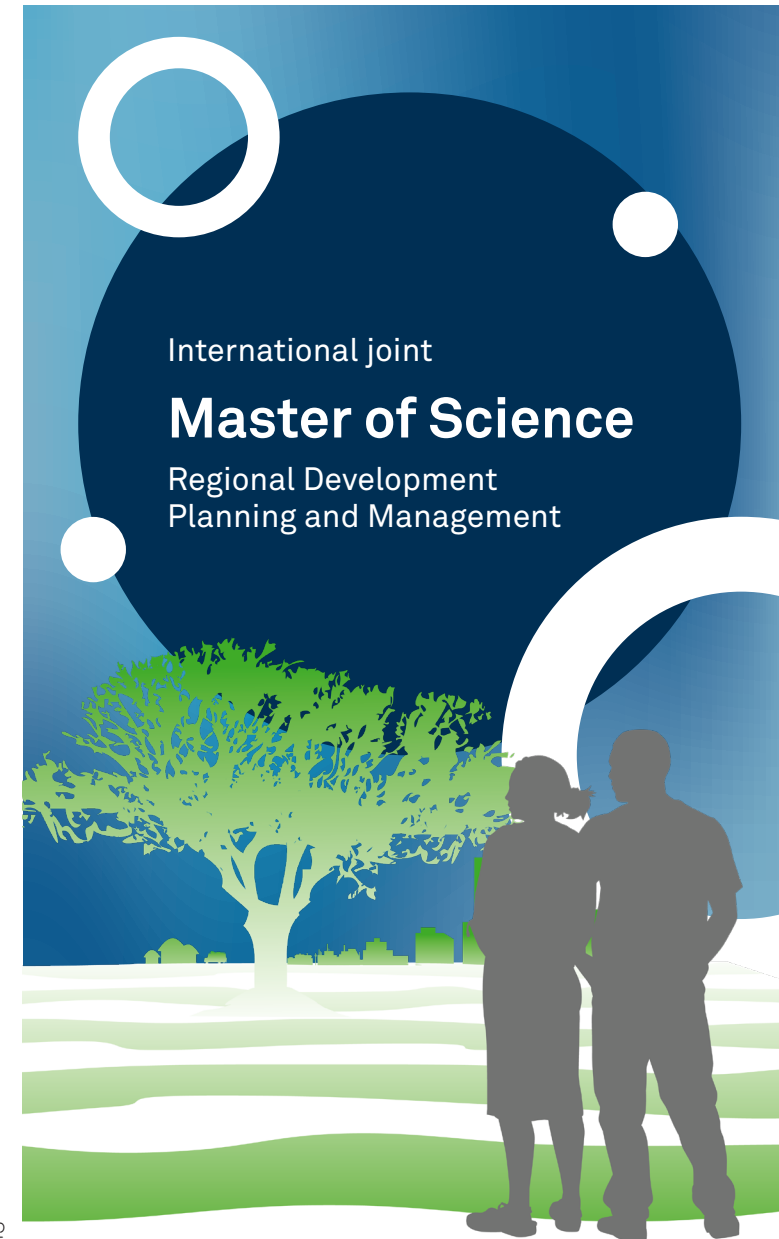

SPRING also means living in a multicultural environment and making friends from across the globe.

Why you should enrol in the SPRING programme

Do you want to be a successful planner?

You are aspiring to secure a leadership position and you are wondering about further education to acquire the necessary professional skills for an exciting career as a development planner? SPRING Programme is the right choice for you as it offers you the best opportunity to pursue your professional dream. So, make up your mind and enrol in the SPRING Programme.

Learning at the SPRING Centres is an exciting experience. The unique SPRING University Network across the globe knows no geographical frontiers. It offers you the best possibilities for individualised learning with a concise class size and lively academic exchange with the staff of the SPRING Centres.

The lecture modules of the SPRING Programme combine theoretical knowledge and practical experience for you to gain a deeper understanding of regional development planning and management. The courses during the first year at the TU Dortmund University follow the ideal planning cycle and are structured in three phases viz. analysis, planning and implementation. Each phase converges into a one-week workshop integrating the various modules.

The second year of the SPRING Programme is offered at the partner universities and provides you the opportunity for applied field research culminating in a Master's thesis which is a mandatory component of the final examination.

Competences of SPRING graduates

SPRING programme provides students with

- o a broad inter-sectoral knowledge and skills across three major regional development planning fields: natural resource planning, physical infrastructure planning and socio-economic development planning;
- o the capability to design regional development activities in a pragmatic, problem and action oriented manner;
- o the competency in applying the three major action phases of the planning cycle: analysis, planning and implementation;
- o the ability to reconcile participatory planning from below with the requirements of planning from above and the framework set by national policies and
- o the capability to combine various personal characteristics such as logical thinking, flexibility, creativity, organisational and communicative skills.
